

TOMBSTONE PROSPECTOR

JANUARY - - - 26, 1889

LOCAL NOTES.

Not a paper filed for record to-day.

At the Pony, Clam Juice. Try it. 28th

J. B. Barnett is home again from Bisbee.

Take your prescriptions to Yonge's Drug Store. 12 1st

Tom Lindsley, of the wholesale shoe firm of Orr & Lindsley, of St. Louis, is in the city.

W. C. Monk is over from Wilcox, looking after the affairs of the Probate Judge and School Superintendent.

An immense lot of new goods in the line of wall paper, crockery and glassware just received at Baggs's.

Attention is called to the notice to creditors of the Old Guard Mining Company in this issue of the Prospector.

Cards are out announcing the marriage on January 31st, of Scott White of Cochise county, to Lady Lyons, of Austin, Texas.

The bill for the removal of the capital to Phenix provides that the Legislature shall meet at the new capital on Feb. 4th.

The Bisbee telegraph line has been completed and the first message over the line was sent by Lewis Williams yesterday afternoon.

The only news received from Prescott to-day was that the Governor held the capital removal bill in his possession and the Legislature was waiting for his signature.

A rich strike is reported in the Crocker mine of the Quijota group. It was struck on the 100-winch of the south drift. The ore is said to average 160 oz. and plenty of it.

The Palace Hotel is now better than ever prepared to accommodate the public. The only two-story hotel in the city. First class in every respect and furnished throughout in elegant shape. Tenth and Fifth street. Visitors to Tombstone should ask to be left at the Palace.

The following advertisement appeared in a London paper of late date: "Wanted, four lads to go to America to ride at exercise in a racing stable, under 17 years of age, and the weight under 6st 7lb, to be started for four years. Must have been in a racing stable and have good recommendations."

The Mansion House, at Bisbee, is the only hotel in the copper camp. Forty elegantly furnished rooms. Just opened and everything new. Elegantly furnished club rooms. The bar is supplied with the best of liquors and cigars. Ask to be shown to the Mansion House when you go to Bisbee.

There will be service in the Methodist church to-morrow evening at half-past seven o'clock. The new pastor, the Rev. J. W. Freeman, of Denver, Col., will officiate for the first time in this city. He is a very pleasant gentleman and we predict for him a successful career in this section of Arizona.

Don't fail to get one or more tickets in the Raffle at Henry Campbell's saloon for the elegant Black Bear and Wolf Bed Spreads and Rug. Only 85 tickets for the two robes and rug. Two highest first and second choice; lowest, third choice. These are new and choice goods and much cheaper than retail prices. 1-21th

There have been thirty-two counterfeit bills of Bank of England notes in the last century, but in almost every instance the men have been sent to prison before any benefit was reaped. Only five bills of the last counterfeit had been put out before the plate was seized.

The Manufacturer's Record says that the increase in valuation in eight Southern States since 1880 has been not far from \$800,000,000. This increase in valuation has in each State been accompanied by a decrease in debt, and what is better an increase in educational facilities.

Unless that you know that a man is an habitual liar you have no right to call him a liar of any sort. This is a decision handed down by an Ohio court. A man who lies two or three times is no more a liar than a man who drinks now and then is a drunkard.

Eye Openers.

The entire press of Phenix are condemning Judge Barnes in most severe terms for his action in stepping off the bench to lobby in favor of the capital remaining in Prescott. The Gazette heads its article thus: "The judicial ermine dragging in the cesspool of jobbery." The Herald says:

"There is much comment here on the actions of Judge Barnes, of Tucson, who is here, and also United States Marshal Mendenhall, as both seem to be exerting their influence in a dictatorial manner and very unbecomingly the high official positions which they occupy."

The carpet bagger from Illinois has this time convinced even his staunchest supporters that he is not a fit person to set on the bench.

Counterfeit Money.

John S. Bell, Chief of the United States Secret Service has submitted his annual report concerning counterfeiting. It shows that 407 arrests were made during the year 1888, and of these 145 were convicted. The fines collected amounted to \$22,491. The counterfeit coin captured was \$2,117,523; spurious plates, \$5; notes, 45; dies, 49. Counterfeit money to the amount of \$826,330 has been destroyed during the year. This has been accumulated since 1876. Of the persons arrested 183 are Americans and 132 foreigners. Chief Bell submits an amendment to the consideration of the Secretary of the Treasury, and recommends that it be enacted into a law to facilitate the work of the secret service. He also asks for an increase of \$100,000 in the appropriation for the secret service.

In the Soup.

Whenever a ditty theatrical crowd Or a second-rate minstrel troupe, Gets too heavy a load and busts up "on the road," They are said to be into the soup.

His creditors all to recoup, Then the poor and the rich fell in Panama's ditch, And de Lesseps fell into the soup.

If Emperor William continues to boast And threatens all Europe to scoop, He may once go too far, and get into a war, And find himself into the soup.

So let us all live in good will with the rest, That our good fortune never may droop; Each do what he can for his poor fellow-man, And keep every one out of the soup.

A private letter from Lancaster, Cal., furnishes the information that Mr. M. T. Summers, of Tombstone, was married in the former city on the 24th inst. to Miss Sophia J. Shearer. Mr. Summers is the well known manager of the Papago store in this city. He will probably reach home to-morrow with his bride and will receive the hearty congratulations of his many friends.

Attention, Firemen: The regular monthly meeting of engine company No. 1 will be held at the engine house to-morrow (Sunday) afternoon at 3 o'clock. All members are requested to be present. GEORGE NODDIE, Foreman.

F. & A. M. Attention.

King Solomon Lodge, No. 5, F. & A. M., officers and members, are requested to attend a special meeting this (Saturday) evening, at 7:30 o'clock, for work in the Second Degree. By order of the Master.

A. L. Gnow, Secretary.

DISSOLUTION OF PARTNERSHIP.

NOTICE IS HEREBY GIVEN that A. A. Castaneda, of the firm of J. Goldwater & Co., has sold all his right, title and interest in the said firm to Lemuel Goldwater, who will in future be a full partner in all the firm's business houses. The present firm of J. Goldwater & Co. consists of J. Goldwater, A. Guindani and Lemuel Goldwater, who will collect all accounts due the late firm and who will pay all liabilities of said firm. J. GOLDWATER & CO.

Dated Fairbank, Jan. 16, 1889. 1-21

The Pacific roads are using a rotary snow plow this winter which will cut its way through a drift fifteen feet thick and half a mile long in twenty minutes. Old Boreas won't be much of a chap ten or fifteen years hence.

WEEKLY MINING REPORT.

Mine Owners Getting Down to Business Principles.

The Rich Strike in the Sea Surge a Bonanza.

"Nothing new," was the answer that greeted our reporter this week as he met various mining men in his weekly rounds, but that which appears to be nothing to those on the inside is generally news to those on the exterior. The rich strike in the

SEA SURGE.

Has been the topic of conversation during the past few days. The strike was made at a depth of 150 feet on the ledge. The ore streak commenced to widen and grow richer at a depth of 140 feet, and at the present time the ledge is almost solid metal. From three to five dollars per pound is the value of the ore, and from present indications it bids fair to prove a more extensive and important find than at first supposed. On the

FRANKLIN.

The adjoining claim, good ore has also been struck. The boys at work here are confident that they will soon have the same rich streak which has been encountered in the Sea Surge.

The other mines in this vicinity are working their usual number of men with variable results. On the

T. M. & N. CO.

Properties there is nothing new to report, the usual amount of ore is being shipped and the same number of men are at work.

In the Emerald the same report is given. The Bunker Hill is going forward with the work of putting the finishing touches on the new hoisting machinery, while the output from the old incline is not diminished in the least.

The Herschel continues to look well and the output is resulting in even more satisfactory results than at any time in its history as a bullion producer.

Judge Benson has gone east and the management of his properties has been given to another mining man who is working there with the expectation of enlarging the scope of his labors in the near future. The present cold weather has interfered somewhat with the work of removing the Head Center mill to its new location just outside the city limits, but the stamps will soon be heard and another bullion-producer will be added to the list. One of the strange facts discovered during a recent visit to Bisbee was that copper ore carrying 15 per cent copper could be worked by chlorides at a good profit. While strolling over the neighboring ground in the vicinity of the Queen mine it was astonishing to see the number of claimers at work on contiguous claims who were making money. One claim in particular,

THE GARDNER.

Belonging to Gardner and West Howell, was being worked through a tunnel in the side of a mountain which seemed to be all copper. A large body of high grade ore had just been discovered in the extreme end of the tunnel which bids fair to last for a long time. The ore, we were informed, would average 15 per cent which is considered very good. It should be remembered that the Copper Queen ore averages about 12 per cent. With the advent of the railroad, which has just been completed, the chlorides can work his claim with the double assurance that he can ship if he cannot sell to the local company.

The gold belt lying below Bisbee is being worked by a number of parties who are reported to be doing well.

NOTES.

An interesting feature of the Arizona stock market for the year 1888 is the amount of assessments levied during the year. Those properties assessed were mostly located at the Quijota. They were as follows:

Crocker	\$25,000	Total	\$105,000
Locomotive	25,000	"	100,000
North Peck	5,000	"	11,000
Peckless	25,000	"	345,000
Summit	5,000	"	117,500
Total	\$85,000		\$678,500

COPPER MARKET.

Montana keeps the lead as a copper producer, and is quite likely to continue to do so, unless the Anaconda restricts production, for a large increased output will come from the Boston-Montana and the Butte and Boston and some other mines during the current year.

Arizona is greatly increasing its production also, and New Mexico enters the field with a fair amount, which will be increased in another year.

The mines are everywhere in better condition to-day than they were a year ago, and it would be far less unreasonable to expect the production during the year 1889 to amount to 300,000,000 pounds, if prices of copper are maintained, than it would have been a year ago to predict an output of 225,000,000 pounds for 1888.

The capacity of this country to produce copper has not yet been measured, and except in a very few of the great mines, has not been touched. The addition of new mines is taking the place of any diminution in the output of the great Anaconda and Calumet & Hecla, should it have no more accidents, will increase its output to the limit its agreement with the syndicate will allow.

HARRIS HALL.

The Phenix Herald gives the following as the cause for the downward tendency in the boom in the new district:

"The secret of the attempt to discredit the new bonanza has leaked, or rather has been deduced from the dereliction of movements by interested parties. The man Lyle, of the Quijota mines, went out there and tried to buy the mines at his own figures, and failing to get them he set about a systematic scheme of 'bearing' the market, and has enlisted the help of those unprincipled enough to assist in his scheme. This is the explanation of the recent misrepresentations as to the value of this property, and by a gentleman who arrived from the mines yesterday."

In the Vekol mines they have a rich and extensive body of ore in the Argosy, to which they are now running a straight tunnel for working purposes, and as soon as this tunnel is completed, through which the ore will be carried, the mill will be again started. This property has already produced over \$800,000 in bullion, and the workings are still above ground, everything being carried out through the tunnels and no hoisting has yet been done.—Citizen.

MOHAVE COUNTY.

The storm during the past week has caused the ore teams to hang up—some of them on the road—and no ore can be moved until the weather settles. Messrs. McCall, Harvey & Co. have paid over \$10,000 in royalty, not including 14 tons to bear from, during their recent lease of the Minnesota mine, near Chloride.

Tom Oliver has again resumed work on the Prosperity. The Oliver Bros. have done several thousand dollars worth of dead work on this claim—among other things a tunnel more than 350 feet in length and which taps the mine at a considerable depth. They now propose to do some systematic cross-cutting, and if there exists another ore body under the old works it will undoubtedly be found.

Tom McMahon has resumed work on his Young Hyson mine. An inspection of the mine revealed a 20-foot back in the north slope and 15 in the south. Tom has adopted a wise plan—the first grade of ore has heretofore worked over 500 and the second over 150 ounces silver at the smelter—he will henceforth make but one class of the ore and thereby save the expense of assorting and still have a fine grade of ore.

YAVAPAI COUNTY.

The owners of the Lynx Creek placers are looking forward to a big and productive run this year. The snow fall near the head of Lynx Creek will no doubt furnish an abundance of water for an unusually long season this year. Those diggings have already yielded thousands of dollars in gold, while hundreds of thousands more are in sight.

John Duke returned Saturday evening from doing assessment work on a number of claims in which he is interested in the Black Hills. The property is located about six miles south-east of Jerome. The ore assays over 20 per cent copper, and is also rich in silver and gold, the ledges being large and well defined. Mr. Duke says the

topography of the country in the vicinity is such as to enable the ore to be worked at a very small cost.

The Boggs, Hackberry and Best Dower group of mines, Big Bend district, recently incorporated under the name of the Big Bend Reduction Company, have commenced work in the way of putting on a force of some eight or ten miners, and development work will be vigorously pushed ahead. Early in the spring it is expected that a 50 ton mill will be put up. These mines are favorably known by all mining men in this vicinity. In the last year large shipments of ore have been made to Colorado for treatment, the ore being an oxidized sulphuriferous copper, similar to the Jerome mines, carrying besides copper from 30 to 40 gold per ton and some 20 ounces of silver. Mr. Boyd, who is an experienced and practical miner, will first thoroughly open up the Boggs by extending the drift north and south upon the ore body at a depth of 100 feet, as to make necessary connections for good air. At an early date hoisting machinery will be erected, and pumps put in to drain the lower levels.

Disbonds were paid in San Francisco by mining companies in November by the amount of \$281,290.

Seigniorage on the output of silver from July 1, 1878, to June 30, 1888, has amounted to \$475,046,192.

The Phenix mine near Chloride, Ill., which have been closed some time, will be reopened shortly.

The imports of lead at New York from January 1 to Nov. 3, last year, were 321 tons as against 3353 tons in 1887.

The bill introduced into the Senate recently by Reagan, of Texas, for the free exchange of silver, is a move in the right direction.

Disbonds amounting to \$3,100,000 were paid by nine mining companies of Montana, during the first eleven months of last year.

The gold-silver mine near Oakland, Ore., is yielding fifteen thousand pounds monthly. This is the only claim deposit on the coast now worked outside of California.

The mines of Admiralty Island, one hundred miles south of Douglas Island, Alaska, are said to have been sold to an English company for a very large price.

For some months the attention of the lead miners of the United States has been turned to the Mexican border, where lead ores are being brought into this country without paying any duty.

Bricks made from the refuse of slate quarries are stronger than stone; they stand 7200 pounds compression against 6000 for stone, and 3200 pounds for common brick. The cost is \$12 to \$20 per thousand.

Australian sheep are hereafter to be sheared with shears worked by steam. One pair of shears clips 350 sheep per day and does it nicely. Landed cry for it.

NEW TODAY.

CHANCERY NOTICE.

IN THE HIGH COURT OF JUSTICE, Chancery Division. In the matter of The Companies Acts, 1862 and 1867, and in the matter of The Old Guard Mining Company, Limited.

The creditors of the above named company are required to or before the 9th day of April, 1889, to send their names and addresses the particulars of their debts or claims and the names and addresses of their creditors (if any) to Frederick Whimpy, of No. 8 Old Jewry, in the City of London, England, the official liquidator of the said company, and if so required by notice in writing from the said official liquidator, are by their collectors to come in and prove their said debts or claims at the chambers of Mr. Justice Chitty, in the Royal Courts of Justice, Strand, in the County of Middlesex, England, at such time as shall be specified in such notice, or in default thereof they will be excluded from the benefit of any distribution made before such debts are proved. Thursday, the 18th day of April, 1889, at 11 o'clock in the forenoon, is appointed for hearing and adjudicating upon the debts and claims.

Dated this 14th day of January, 1889. GEO. A. CROWDER, Chief Clerk. Michael & John's Sons & Co., 8 Old Jewry, London, E.C., and 23 Rue Talbot, Paris, Official Liquidators.

TREES.

Two, Three and Four Year Old Fruit Trees.

Fruit trees, two, three and four year old, Umbrella, Mulberry, Peach, Pear, Apple, Apricot, Fig, Plum, Prune, Nectarine, Almond, Japanese Persimmon, English Walnut, P. magnifica, Fruiting, two-year old Grapes, Gooseberries, Raspberries, 1,600 Rose bushes, 85 different varieties; Lilac, Camellia, Pinks, Mock Orange, Magnolia, Poinsettia, flowering, Honey-suckle, Lilly of the Valley, Cyprinus, Cichlas, Passion Vines, Double Camellia, and many other plants received from California, for sale by Williams French, corner of Second and Fulton streets, Tombstone, A. T. 1-26m

The Dominion debt increased over \$7,000,000 last year, with no particular return that the average taxpayer can realize, and there is a howl all over the country for reform. They have not learned yet that the reformers generally take all that is left.

Fresh Ranch Butter from the ranch of J. A. White at Wilcox. All Store. 3-7th

Job Work neatly executed at this office.

Trustees Sale.

We have to sell a large tract of land, known as the "Boggs" tract, situated in the Boggs district, Big Bend, Texas, containing about 100 acres, more or less, and is well adapted for raising stock, and is also well adapted for raising cotton, and is also well adapted for raising sugar cane, and is also well adapted for raising all kinds of crops. The land is situated in the Boggs district, Big Bend, Texas, and is well adapted for raising stock, and is also well adapted for raising cotton, and is also well adapted for raising sugar cane, and is also well adapted for raising all kinds of crops.
